An independent review of the above-referenced case has been completed by a medical physician board certified in physical medicine and rehabilitation. The appropriateness of setting and medical necessity of proposed or rendered services is determined by the application of medical screening criteria published by \_\_\_\_, or by the application of medical screening criteria and protocols formally established by practicing physicians. All available clinical information, the medical necessity guidelines and the special circumstances of said case was considered in making the determination.

The independent review determination and reasons for the determination, including the clinical basis for the determination, is as follows:

See Attached Physician Determination

\_\_\_\_ hereby certifies that the reviewing physician is on Texas Workers' Compensation Commission Approved Doctor List (ADL). Additionally, said physician has certified that no known conflicts of interest exist between him and any of the treating physicians or providers or any of the physicians or providers who reviewed the case for determination prior to referral to \_\_\_\_.

TREATMENT:

Approval Advised as Treatment Medically Necessary

TREATMENT DURATION:

Approval of Duration of Treatment is advised as Medically Necessary

OTHER ADVISEMENT:

The pre-authorization reviewer's reason for denial was lack of clinical evidence in support of the muscle stimulator. The subsequent information provided by the ordering doctor reveals consistent use by patient with a documented positive response to Rx. There is also a usage log provided indicating nearly daily usage for one month. There is a follow-up visit with the ordering physician indicating good response to Rx. This is a reasonable medical device for pain control in this patient and is therefore medically necessary.
